

Make 2021 the year of new beginnings  
**START WITH A DREAM**  
**FINISH WITH A FUTURE!**

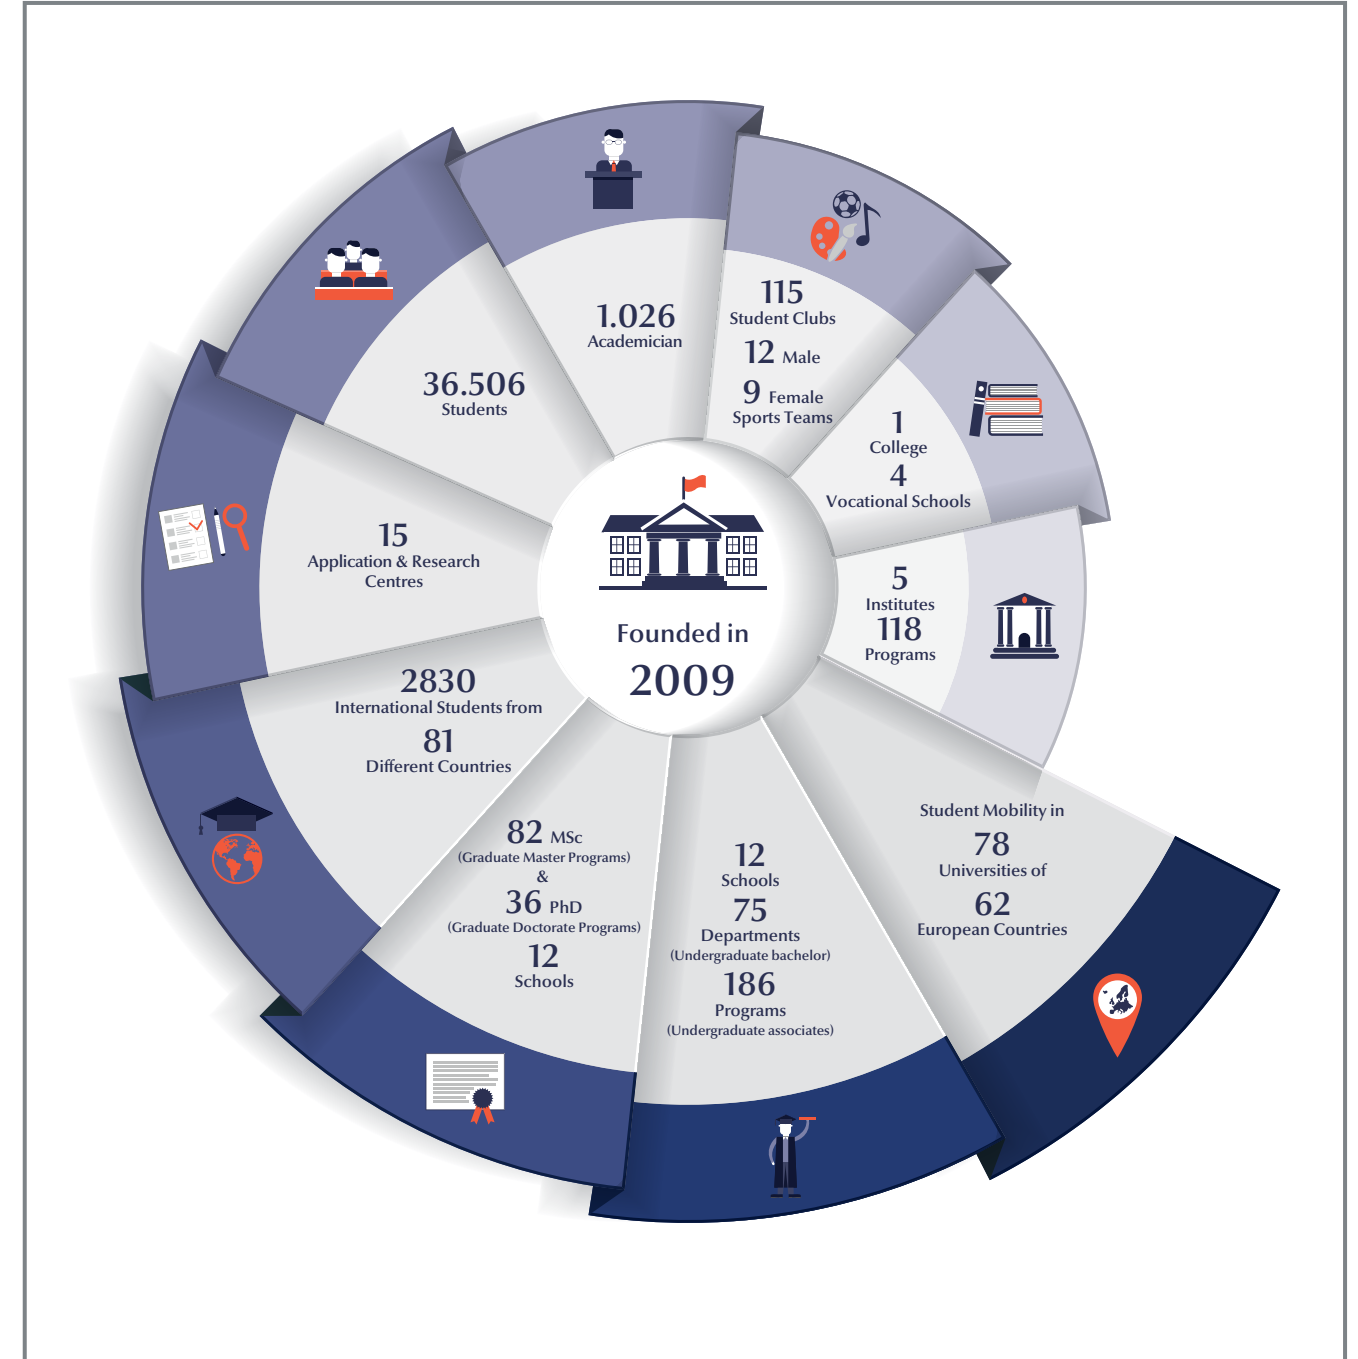

## The Door To The Future

You knew no limits and did your best to reach the knowledge. You worked heart and soul, improved yourself, pursued your dreams and achieved. Thanks to Istanbul Medipol University's vision of being a pioneer in science along with its academic staff and technological means used to make your dreams come true, the future is now yours!

**Istanbul Medipol University is placed among the top 100 universities by Reputation!**

## Our Mission

Istanbul Medipol University (IMU), offering unique educational services, has made a prime commitment to

- ▶ train with praiseworthy excellence;
- ▶ focus on producing science and technology.

Additionally, the prospective trained individuals in IMU are able to respond to continually changing demands of society and contribute to the scientific insights and social welfare.

## Our Vision

Enriched with three built-in features of a strong organizational culture, entrepreneurship spirit and durable dynamism, IMU – being a leading university – will enlighten and guide science and society.

### Our Core Values

- ▶ Committed to ethical values
- ▶ Human-oriented
- ▶ Perfectionist
- ▶ Environmentally conscious
- ▶ Participatory
- ▶ Tolerant
- ▶ Innovative
- ▶ Liberal

## Welcome to Istanbul Medipol University

Started its education life in the historical peninsula, which is the oldest region of Istanbul, Istanbul Medipol University is a central education centre with its modern classrooms, laboratories, library and facilities located on both sides of Istanbul. Istanbul Medipol University is rapidly rising in the world rankings with its scientific research projects supported by the application and research centres alongside its dormitories on both Kavacık South and North Campuses and sports fields.

Istanbul Medipol University offers students a unique educational experience with its quality education, expert academics and application opportunities. Istanbul Medipol University, with twelve schools, four vocational schools, one college and 2830 international students from 81 different countries, continues to be the university of those who will shape the world. Aimed at producing science and technology, the named services are implemented by resorting to topnotch educational procedures. Owing to our academics with international merits in their fields and cutting edge educational gears, IMU departments have possessed the potentials to maintain a brighter future.

## Why Choose Istanbul Medipol University?

Istanbul Medipol University -a corporate, enterprising and innovative university that shapes the science and the society- aims to deliver an exceptional educational environment to its students from all over the world who are passionate about research. Istanbul Medipol University increases its achievements every year with scientific research it shares with the academic world. It empowered its one of a kind education by being the youngest university in the world rankings.

In 2020, Istanbul Medipol University ranked in the 401+ band of the best young universities created by the Times Higher Education (THE), in which global higher education performances for the UN's Sustainable Development Goals are evaluated, and the world's best universities are ranked. Istanbul Medipol University also ranked in the national and international lists created by the Round University Ranking (RUR), which evaluates the effectiveness of universities in the world by four critical dimensions in terms of teaching, research, international diversity and financial sustainability.

Istanbul, which connects the two continents, Asia and Europe, was home to many great empires and inspired great poets with its unique beauty. Istanbul Medipol University offers not only an exceptional education but also an opportunity to experience this great city with its campuses on both continents.

Istanbul Medipol University is among the universities that have the highest rate of the accredited programs. With the School of International Medicine, Medicine, Health Sciences, Engineering and Natural Sciences, Pharmacy, Business Management, Fine Arts Design and Architecture, Communication, Law, Education, Humanities and Social Sciences, Istanbul Medipol University offers 183 undergraduate, 94 graduate programs. Also, there are nearly 20 research centres parallel with the study fields of these schools. From cancer research to sixth-generation wireless studies, from sleep and hypnosis studies to media studies, the opportunity to improve in various areas is here!

Started its education life on the Historical Peninsula, which known as the home to many civilisations, Istanbul Medipol University maintains being one of the leading universities in the health field with university hospitals and research centres. Also, it offers the opportunity for students to practice in its hospitals.

Kavacık Campus, which attracts students' attention with its well-developed infrastructure and modern architecture, has accommodation facilities for girls and boys and offers entirely different life experiences with its central location close to the Bosphorus. The campus an attractive living centre with six sports arenas, 115 student clubs, cultural activities throughout the year and online education opportunities.

Discover MEDİPOL, a place like no other you have experienced before. Istanbul Medipol University is a truly intercontinental university, positioned in the heart of Istanbul, by the Kavacık and Golden Horn, a place surrounded by the heritage of various ancient civilizations and a place where two continents, Asia and Europe, meet. Since its establishment, Istanbul Medipol University has firmly committed to creating an international teaching environment. In this first year of teaching, we admitted about 7 percent of our undergraduate students from various countries across the globe. Our admission process is thorough and carefully considers the backgrounds of our applicants and how they would contribute to our academic community. Currently, Istanbul Medipol University offers programs mainly in the field of health and law medical. Prospective students are welcome to visit the campus sites before applying and free to talk to our students and academic staff.

# Why Medipol? International Students Testimonials

## Tayseer Hussein, Jorden

Electrical and Electronics Engineering

“ After graduating from high school, I wanted to study electrical and electronic engineering. And my obvious choice was Istanbul Medipol University. Not only because of its high education teaching system, but also the ability to work at the forefront of practical technology, researching ways to improve our daily used gadgets and tools. Istanbul Medipol University has the best possible environment for an EE engineer to become a better engineer by providing us with all of the necessary machines and tools like oscilloscopes, voltmeters, signal generators, and more. ”

## Abdul Rahman Akl

Electrical and Electronics Engineering

“ I chose Istanbul Medipol University because although it was founded not too long ago, it resembles the best universities in the world in terms of the research laboratories and hands-on training that it makes accessible and available to its students. Also, when I researched the faculty members, I discovered that among them are professors of high-calibre, such as Dr. Hüseyin Arslan, who worked on developing 5G Technology. So I believe that Istanbul Medipol University was the best choice for me and I am looking forward to a great educational experience with unique opportunities. ”

## Wael Shamsi Basha

Biomedical Engineering

“ Following my passion for applied sciences, I decided to study biomedical engineering at Istanbul Medipol University as it has a wide variety of developed technologies such as advanced laboratories and modern equipment that can help students prepare for their future careers. I chose biomedical engineering here at IMU because it helps to improve human health by applying the principles and methods of engineering to medical problems as it merges between biology and engineering. Also, IMU focuses on applying the learnt subjects in real-life situations. ”

## Mona Habra

International School of Medicine

“ Istanbul Medipol University attracted me as a medical student with all the opportunities it provides: whether you want to study abroad or in one of the well-known hospitals of Medipol. They also really take care of the student's feedback and are always willing for a better chance. The mesmerizing campus made Istanbul Medipol University one of my best choices. ”

# Istanbul Medipol University on World University Rankings

Istanbul Medipol University manifests its quality education and research with its successful place in the rankings listed by the world's most respected higher education ranking agencies.

Istanbul Medipol University, which has strengthened its quality by fulfilling its accreditation processes in 2019, ranked in many university rankings such as Times Higher Education (THE), University Ranking by Academic Performance (URAP), Scimago, Round University Ranking (RUR), Webometrics and U-Multirank.

## THE World's Young University Rankings

Times Higher Education is a London-based rating agency that ranks universities according to certain key performance indicators such as research impact, citations, international impression, and learning environment. Istanbul Medipol University ranked in the 1001+ range on THE World University Ranking where over 25 thousand universities were evaluated. Medipol also ranked 401+ on THE World's Young University Rankings, 401+ on THE Asia University Ranking, 501+ on THE Emerging Economies University Ranking and 601+ on THE Ranking by Subject: Clinical, Pre-Clinical and Health. # Campuses

## Kavacık Campuses

Istanbul Medipol University has two campuses, South and North, in Beykoz Kavacık. Located at the Anatolian end of the Fatih Sultan Mehmet Bridge just at the exit of the bridge, Kavacık Campuses stand out with their central location adjacent to Beykoz Forests. Kavacık Campuses stand out with their large and spacious amphitheatres, tennis and basketball courts and recreational spaces, classrooms, and gardens. Istanbul Medipol University aims to establish an educational base in Kavacık.

## Haliç Campus

Haliç Campus is located along Haliç (Golden Horn) in Suriçi. Situated in the most central location of the city, the Campus stands out with the surrounding historical and cultural wealth. Haliç Campus is the home to a vibrant university

life thanks to its modern building, spacious lobby, and gardens. About 80 student clubs, including cinema, drama, music, travel, and photography, spice up this vitality.

## Bağcılar Campus

Offering applied courses and clerkship training programs to students, Medipol Mega University Hospital in Bağcılar is outstanding for its central location along with TEM (Trans-European Motorway) and its functionality as a giant educational complex. Medipol Mega University Hospital incorporating 4 hospitals – General, Oncology, Cardiovascular Surgery and Dental Hospitals – allows the students at Medipol to have hands-on training thanks to its inpatient capacity of 470 beds along with 133 intensive care units, 246 outpatient rooms, and 25 operating rooms.

SCHOOLS  
COLLEGES  
GRADUATE SCHOOLS

# International School of Medicine

## International School of Medicine

Program 100% in English

Istanbul Medipol University ISM provides its students with the means of researching at an international level. Istanbul Medipol University students can have a unique career opportunity by combining the integrated doctoral program (M.D./Ph.D.) with “medical doctoral” and “science doctoral” programs. Medipol Mega Hospitals Complex having a cooperation protocol with our University contributes to the University Hospital in terms of training and research infrastructure. Training and health services are provided by Esenler Hospital, Sefaköy Hospital, Fındıkzade Hospital and Vatan Clinic within the Health Practice and Research Center.

### One Step Ahead with the Research-Oriented Curriculum!

Young doctors with a good command of English graduating from Istanbul Medipol University

International School of Medicine that features student-centered practices are given the opportunity to specialize in basic sciences by the Integrated Doctoral (MD/PhD – Double Doctorate) program which they can start during their education period.

# School of Medicine

## School of Medicine

Program 30% in English

The School of Medicine aims to educate and train inquisitive physicians in line with the school of inquisitive education adopted by Istanbul Medipol University. It positions students beyond being a medical student and gives them enough experience to design and conduct a research process. The aim is to train our students as physicians who can reason critically, think independently and carry out scientific studies in basic medical and clinical sciences.

Medical research principles and practice merge in Istanbul Medipol University School of Medicine of medicine thanks to REMER, one of the best research centers in Turkey, and Medipol Mega University Hospital. In addition, further English language education for the English Prep is made possible by the institutions in the US based on the MOU inked in between. In so doing, researcher physicians academically devoted to IMU are targeted to be trained by the faculty.

### Unparalleled academic staff

At our school ranking above the average number of academic members per student in Turkey, every student is assigned an advisor who offers any support needed by our students during their education from enrollment to graduation.

4 hospitals in one

Medipol University Hospital incorporates 4 hospitals: General, Oncology, Cardiovascular Surgery and Dental Hospitals. With an inpatient

capacity of 470 beds along with 133 intensive care units, 246 outpatient rooms and 25 operating rooms, the hospital supplements its infrastructure and technological facilities equipped with smart systems with patient centered superior care approach.

**Let your diploma be recognized abroad as well!**

Those who successfully complete the projected six-year educational period for a medical doctoral program are awarded a "Diploma of Doctor of Medicine". This diploma is at EQF-LLL (European Qualifications Framework for Lifelong Learning) level 7. The medical diploma awarded to our graduates is also valid abroad.

## School of Dentistry

Turkish Program - English Program

\*\*Our school applies the “Process-Based Dental Education Model” which is recommended by the Association for Dental Education in Europe (ADEE). The most important objective of this new education model is to provide our students with the ability to research and learn individually and to enhance the effectiveness of their studies during the year. Turkey’s largest simulation laboratory owned by Istanbul Medipol University School of Dentistry was established to ensure that students acquire manual skills and clinical competencies required during their education and training. Here, students practice regarding various types of dental treatments on prepared manikins.

\*\*With two separate programs offering education in Turkish and English, our school ranks among the most modern and contemporary educational institutions of Turkey and coordinates specialty and doctoral programs in dentistry as well as undergraduate education. Our school applies the “Process Based Dental Education Model” which is recommended by the Association for Dental Education in Europe (ADEE) and characterized by the systematic review of subjects related to dentistry during the period from birth to death of an individual. The most important objective of this new education model is to provide our students with the ability to research and learn individually and to enhance the effectiveness of their studies during the year.

### Turkey’s Largest Simulation Laboratory

A total of 140 manikins are available in simulation laboratories. Students can watch the demonstrations by instructors live via screens available in their units. The center conducts training on artificial patients in dental chairs. Thus, students can practice under ergonomic conditions.

## School of Pharmacy

Turkish Program - English Program

As Istanbul Medipol University School of Pharmacy, we aim to educate and train pharmacists who use their knowledge and skills in a way that contributes to the health of the society, are inquisitive and analyser, protect and glorify the dignity of their profession, and take active roles and responsibilities in every phase of drugs from production to consumption in the light of universal science and technology.

Our academic staff to train the would-be scientists are all with different educational backgrounds holding national and international merits and credentials.

The faculty of pharmacy is to train interrogator, investigator, analyzer pharmacists who take effective responsibility at every stage based on universal axioms of science and technology, from production to consumption of the medicine, contributing to the well-being of the society by producing, honoring and dignifying the profession.

### Opportunity of MD and PhD in Clinical Pharmacy

Combining their academic knowledge and experience with Medipol Hospitals Complex which is the leading health institution in Turkey, Schools of Pharmacy and Medicine of Istanbul Medipol University offer undergraduate and doctoral programs under the umbrella of the Graduate School of Health Sciences in Clinical Pharmacy to any students who want to improve themselves in this field of study. Clinical Pharmacy is not only limited to being a pharmacist serving at a clinic or hospital. Practically, clinical pharmacy is to acquire basic knowledge and philosophies about some aspects such as pharmaceutical care, individual and rational drug use, clinical sciences as well as ethical, socio-medico-cultural and pharmacoeconomic behavior patterns in the graduate education process and to blend them with undergraduate knowledge.

## School of Law

Program 30% in English

The School of Law aims to educate students as contemporary lawyers who believe in justice, freedom, democracy and the rule of law, respect human rights, moral values and universal law principles, are knowledgeable, open-minded and independent, can think analytically, investigate and question, and are equipped with theoretical and practical knowledge.

### Leading for the Research Possibilities Offered

Law is a discipline positioned at the center of social sciences. It offers a reputable professional life in a wide range from specific professional positions (lawyer/judge/prosecutor) to public bureaucracy, from politics to managerial position in the private sector. Students are admitted to graduate and doctoral programs in Public Law and Private Law at the Graduate School of Social Sciences of the university under

the guidance of Istanbul Medipol University School of Law. Additionally, a doctoral program in Health Law was opened for the first time in Turkey with individual thesis and non-thesis MD programs in Health Law. All the opened programs attracted a great deal of attention from lawyers and physicians, especially from judges and prosecutors.

A series of research and practice centers was established under the guidance of Istanbul Medipol University School of Law: Biolaw Practice and Research Center, Information Technology Law Practice and Research Center and International Law and Foreign Policy Practice and Research Center. These centers continue their activities to contribute to national and international legal communities and to produce science in line with the purposes of establishment

## School of Health Sciences

Istanbul Medipol University School of Health Sciences is distinguished from other Turkish universities offering medical education due to the solid infrastructure of Medipol Education and Health Group and has the leading position in this field. Students at the School of Health Sciences complete their education with opportunities of practising within Medipol Health Group that actively provides health services with a total of nine hospitals located on both sides of Istanbul.

The School of Health Sciences offers education via distance education program as well as formal education in Turkish and English. The School has 15 departments for student admissions.

# School of Fine Arts Design and Architecture

## School of Fine Arts Design and Architecture

The goal of our school is to train graduates who are better equipped than their competitors at internationally leading and original design-art and music departments. Particularly, accreditation processes were initiated in the early years for global recognition of the diplomas held by all departmental graduates.

The school, which changes conventional design education patterns, aims to produce innovative joint projects and integrates practical applications with “Design-and-Make” workshops, proved its success with the prizes awarded for the competition projects which students contested from the first years.

The graduates from design departments that allow for specialization depending on different areas of specialty (design, technology and materials, culture-art-history, professional practice-project-management and legal responsibilities, human-structure and environmental health) will have the opportunity to continue their education with integrated MD and PhD programs.

The first integrated MD and PhD program was opened in “Construction Management and Law”. This will be followed by the integrated MD and PhD program in “Design”, which is developed for graduates from other departments.

# School of Communication

## School of Communication

The School of Communication is intended to educate graduates who are equipped well to assume positions in the communication industry and capable of using effective communication skills in business life and follow the developments in communication, have a good command of new communication technologies and are socially responsible. Students can practically acquire and improve these skills in the Media Center of the School of Communication located on Kavacık Campuses. From TV programs to PR campaigns, our students conduct projects in various fields of the media sector for clients.

Istanbul Medipol University School of Communication gives students the opportunity to do a double major or a minor at all departments.

# School of Business Administration and Management Sciences

## School of Business Administration and Management Sciences

Both the rapidly growing dynamic labour of our country and the increasing competition in the business world make it increasingly inevitable for young people who want to succeed to make themselves distinguished. The said distinguishing feature is directly related to the opportunities offered during university years and the maximum level of utilization of them. The primary objective of the School of Business Administration and Management Sciences in education is to educate "global students who are fit and ready for the industry, capable of directing their career and thinking critically and confident."

# School of Engineering and Natural Sciences

## School of Engineering and Natural Sciences

Our School has research laboratories, such as “5G and Higher Communication Technologies”, “Computational Camera Technologies” and “Innovative Microscope Technologies”. Additionally, Istanbul Medipol University started the necessary works for the establishment of the first research laboratory in Turkey for 6G.

### Medipol Pioneered the Reverse Brain Drain!

Almost all academic members of our school returned from abroad and started to serve in their own country. In addition to brain drain, academicians will serve as a bridge between our country and distinguished universities, institutes and companies abroad. The scientists from countries like Germany and Japan, particularly from the US, teach at the School of

Engineering and Natural Sciences.

Our School allows students to attend double major or minor programs. Upon meeting the related requirements, our students will enjoy the opportunity to do an integrated master’s degree at any departments relating to their own field of specialty within the Graduate School of Natural and Applied Sciences.

## College of Health Sciences

Rewarded every year for its achievement in health, the experienced and dynamic staff of Medipol Health Group provides training at Istanbul Medipol University College of Health Sciences and contributes professionally equipped health professionals to the health industry. The College of Health Sciences, offering students a unique opportunity to study with its robust staff and means of practice, educates and trains the health professionals of the future in 9 disciplines.

## Vocational Schools

Programs are located, consists of academic staff who are experts in their own sectors and the course contents of all programs are prepared in the infrastructure required by the sector.

Our curriculum aimed to train our students to be equipped to adapt to all the applications they may come across in the sector once they graduate.

In our programs, both the infrastructure courses for the applications required by the sector are given and the theoretical knowledge required by the developments in the world are met.

Within the vocational schools that stand out with University-Trade Cooperation works, the vocational competencies the student must obtain are updated in parallel to the improvements in the sector.

IMU has been acquired Erasmus+ University Charter and currently establishing bilateral agreements with multiple European Higher Education Institutions.

<https://www.medipol.edu.tr/en/prospective-students/erasmus>

## Double-Major Opportunities

It is possible for our Vocational School students to do a Double-Major Program. Students who study in the Vocational Schools of Justice, IMU, Social Sciences and Health Sciences can get education from other programs according to their success rates, thus can graduate with double diplomas. It is possible to do Double-Major in all programs of the Vocational School of Social Sciences and it is possible to do Double Major in the Opticianry of Vocational School of Health Sciences. There are 111 Departments in the four Vocational Schools that offer education from Social Sciences to Health Sciences with Daytime and Evening Education at Istanbul Medipol University.

While a Double Major can be made in all programs of our Social Sciences Vocational School, a Double Major program can be made in the Opticianry program in IMU and Health Services Vocational Schools. In Istanbul Medipol University, there are 111 Departments in four Vocational Schools, which offer a wide range of education from Social Sciences to Health Services with the opportunity of First and Second Education.

# Grading System And Credits in Istanbul Medipol University

European Credit Transfer System (ECTS) is one of the most important fields of study in the application phase of the Bologna Process in Turkey. In recent years, many universities in Turkey intensified their studies for adjusting their credit and grading systems to ECTS principles. Istanbul Medipol University has prepared this specially designed ECTS Information to clarifying specific details about the academic programs and the understanding of education for Istanbul Medipol University, which have been formed in tune with the Bologna Process. Each detail in the ECTS Information Guide regarding the implementation

of ECTS credits of courses, student workloads, evaluation process, and the relation of all these components with each other have been explained step by step. All of the information provided in the ECTS Information Guide is a complete package that integrates the National Qualifications defined by the Higher Education Council of Turkey (YÖK) and their compatibility with the implementation of the Bologna Process. The beneficiaries of this website will be not only able to access programs offered, course contents but also general information about student life and extracurricular activities both in the city of Istanbul.

## Turkey's Largest Simulation Laboratory

Turkey's largest simulation laboratory owned by the Istanbul Medipol University School of Dentistry was established to ensure that students acquire manual skills and clinical competencies required during their education and training. Here, students practice regarding various types of dental treatments on prepared manikins. A total of 140 manikins are available in simulation laboratories. Students can watch the demonstrations by instructors live via screens available in their units. The centre conducts training on artificial patients in dental chairs. Thus, students can practice under ergonomic conditions.

## Food Preparation and Cooking Laboratory

Food Preparation and Cooking Laboratory, under the umbrella of the Department of Nutrition and Dietetics and operating on Kavacık South Campus, educates students on the content of foods, appropriate preparation and cooking methods, losses during preparation and cooking, and some basic and traditional recipes. The lab is used by students to provide information and gain applied skills. There are ten kitchen units in the laboratory. With this laboratory, students have the opportunity to put their theoretical knowledge of foods into practice in a scientific environment.

## Labs for Students

Laboratories, operating on Kavacık Campuses and used for all units -especially the School of Pharmacy, provide a wide area our students can research. Research laboratories are well-equipped with high-technology and accredited infrastructure integrated with pharmacy-related units for the needs of today's multidisciplinary pharmaceutical R&D. In addition to the training program and equipment that give traditional and up-to-date approaches to the practice of the profession; student labs are designed to enable prospective pharmacists to conduct research under the supervisor.

## Physiotherapy and Rehabilitation Application and Research Center

In two laboratories for application and research purposes in the Department of Physiotherapy and Rehabilitation, students learn the methods of measurement and evaluation in physiotherapy, therapeutic exercises, and study using special equipment and devices. Students learn the use and effects of electro-physical agents and tools in these laboratories by applying them to themselves and gaining professional knowledge and skills. In addition, in the virtual reality and aerobic exercise laboratory, patients with neurological and orthopedic problems are educated and applied training is given by showing analysis and special exercise programs in healthy people. Students conduct research in these laboratories and present the results at student congresses and Future Science Forum held by Istanbul Medipol University.

## Nursing Skills Laboratory

The Nursing Skills Laboratory, under the umbrella of the School of Health Sciences and Department of Nursing located in Kavacık South Campus, was established in 2010 for nursing students to gain the cognitive, affective and psychomotor skills and competencies required during their education. Our laboratory is well-equipped with high-technology products and mannequins to create a real clinic. In the laboratory, students have the opportunity to practice essential interventions specific to the care of the healthy/sick persons, such as hygienic care, oral and parenteral drug applications, joint gap movements, and nursing practices specific to all body systems. Training is carried out on mannequins under the supervisor. Preparatory work continues for the Simulation Laboratory, which is planned to be opened as of the next academic year.

In university hospitals, our students are offered the privilege of a combination of theory and practice classes, and common application areas in healthcare professions. Training and health services are provided in Esenler Hospital, Sefaköy Hospital, Fındıkzade Hospital and Vatan Clinics under the Health Education Application and Research Centre.

### Medipol Mega University Hospital

The largest private health investment in Turkey, Medipol Mega Hospitals Complex serves as a health complex incorporating four individual hospitals as well as being a University Hospital. It stands out as the private hospital featuring the highest number of disciplines in Turkey together with General Training, Oncology, Cardiovascular Surgery and Dental Hospitals.

### Medipol University Çamlıca Hospital

Istanbul Medipol University Çamlıca Hospital, which is located in the Anatolian Side of Istanbul, offers health services in 19 different branches in total. The hospital provides services with its intensive care units, six operating rooms with advanced technology, laboratories, comprehensive emergency service and advanced treatment units.

### Medipol University Pendik Hospital

Istanbul Medipol University Pendik Hospital offers health services in many branches. Intensive care units provide service 24/7 with advanced technology operating rooms, laboratories, emergency services and rooms equipped with advanced treatment units.

### Istanbul Medipol University Oral and Dental Health Training, Practice and Research Centre

Training and health services are provided by Unkapanı Hospital and Esenler Clinic within the Oral and Dental Health Practice and Research Centre. Additionally, Medipol Mega Hospitals Complex having a cooperation protocol with our University contributes to the Dental Hospital in terms of training and research infrastructure.

### Istanbul Medipol University Dental Hospital

Opening its doors to the public in 2011 on Haliç Campus, Medipol University Dental Hospital is not only one of the largest dental hospitals in the region with its departments of Oral and Maxillofacial Surgery, Oral and Maxillofacial Radiology, Endodontics, Conservative Dentistry, Orthodontics, Pedodontics, Periodontology and Prosthodontics, but also an important source of training which allows students at Istanbul Medipol University Department of Dentistry to practise their learning.

For detailed information, please visit <https://www.medipol.com.tr/en/#plan-your-visit>

## Regenerative and Restorative Medicine Research Center

Regenerative and Restorative Medicine Research Centre, Cancer Research Centre, Drug Development Centre, Bioengineering and Biotechnology Research Centre, Neuroscience Research Centre, Medical Research Centre (MEDITAM) and Genetic Diseases Diagnosis Centre (MEDIGEN) are joined together under the roof of Health Sciences and Technology Research Institute (SABITA) for multidisciplinary research projects.

REMER stands out as Turkey's most pivotal research centre in cellular imaging. Including a great number of laboratories, some of which are the most advanced centres in Europe among their peers, REMER serves as the basis for the recruitment of many qualified researchers. Istanbul Medipol University, setting out to prepare its students for tomorrow's powerful Turkey and building a successful career for them, derives its power from its internationally experienced specialized academic staff, solid health infrastructure and well-equipped high-technology laboratories.

One of the prestigious centres of Medipol, REMER is the home to potentially pioneering high-quality research projects relating to the regeneration of damaged and dysfunctional tissues and organs, particularly of the nervous system and cardiovascular system. Cell Culture, Molecular Biology, Genomics, Bioinformatics, Proteomics, Dental, Biomechanics, Electrophysiology, Advanced Microscopy, Pharmacology, Analytical Chemistry and Experimental Animals laboratories serve under the umbrella of REMER.

## The Infrastructure of Remer

- ▶ The most advanced and full-capacity microscopic imaging laboratories of Turkey
- ▶ The richest variety stock of transgenic animal of Turkey
- ▶ One of the full-capacity experimental animal centres of Turkey, with a special animal called axolotl
- ▶ The most advanced systems biology laboratories of Turkey
- ▶ The best working electrophysiology laboratories of Turkey
- ▶ The only single-cell mechanic laboratory of Turkey
- ▶ The best working optogenetics laboratories of Turkey
- ▶ One of the full-capacity HPC systems of Turkey
- ▶ The Infrastructure of Remer

## Mediterranean Studies Application and Research Centre

Mediterranean Studies Application and Research Centre aims to develop a platform of discussion, understanding and cooperation on social, cultural, religious, political, ethnic and other human problems that prevail in the entire Islamic geography including the Balkans and the Caucasus, especially in the Mediterranean basin, and hinder the civilized presence.

## Health Systems and Policies Practice and Research Centre

Our university was founded to carry out studies that would contribute to health-related issues, produce evidence-based policies and guide health administrators and policymakers by utilizing the knowledge of experts from different disciplines under its umbrella. The intention is to become a reference centre that produces and steers innovative policies at local, national and international levels for health systems and policies. also join research projects as volunteers during holidays. This opportunity enables Istanbul Medipol University students to be the best in professions of their choice and contributes them an inquisitive nature.

## Biotechnology and Bioengineering Practice and Research Centre (BIOMER)

The centre aims to be an internationally competitive research institute that will bring researchers in medicine and engineering together in joint projects in the same environment. The centre provides a desirable employment area for qualified scientists and assistant staff members through its available research and infrastructure facilities also aims to help the development of associate degree and undergraduate students and contribute them to our country and the science

world as new researchers. With very solid national and international ties, BIOMER will become the hub of studies between universities, disciplines and nations in line with these goals.

## Climate Change Studies Practice and Research Centre

The key objective of this centre is to research the adverse impacts of climate-induced changes on our country and take mitigation measures against such adverse impacts. Additionally, the objectives of the centre include the conduct of scientific studies on how to adapt to climate change.

## Dream, Sleep and Hypnosis Studies Practice and Research Centre (RUHMER)

The centre deals with sleep and dreams by a multidisciplinary approach using various instruments, such as EEG, PSG, tDCS, TMS and Neuropsychological Assessment, together with a team of graduate and doctoral researchers along with experienced psychiatrists and neurologists.

## IT Law Research Centre

Istanbul Medipol University Information Technology (IT) Law Research Center, which is designed to play an active role in determining the policies to be followed in relation to Turkey and introducing the key applicable legal regulations, aims to remediate the inadequacy of skilled legal professionals in this field through undergraduate, graduate and certificate programs and bring up the related national primary concerns and policies to the agenda of the country and inform the public of major issues in this field. The centre organizes regular workshops in IT law and closely follows the agenda of IT with panels and conferences where academicians and skilled practitioners are invited to evaluate current developments.

### International Law and Foreign Policy Research Centre

Istanbul Medipol University International Law and Foreign Policy Research Centre aims to provide the public with insight into major problems in international law and foreign policy by analysing actual and potential problems in these fields and to take an active role in efforts to solve these problems.

### Biolaw Research Centre

The Biolaw Research Centre, which aims to study usual and unusual formations and structures such as gender identity discussions, organ transplantation, wet nursing, cloning and superior race (eugenics), was established to ensure the development of law along with biological sciences.

### Pharmaceutical and Health Law Application and Research Centre

The centre carries out studies to discuss the legal problems encountered in medicine and propose solutions, to conduct the research projects required by national and international public and private institutions-organizations, to provide training and consultancy services, and to contribute and support undergraduate and graduate education.

### Istanbul Medipol University Distance Education Practice and Research Centre (MUZEM)

MUZEM aims to carry out research and development, practical studies and publications related to distance education at the university, open e-learning based courses and programs

at all levels, support the courses offered at the university through e-learning and organize diploma and certificate programs for all segments of the society wherever needed.

### Conventional and Integrative Medicine Research Centre

The establishment of the centre was intended to conduct research on conventional and integrative medical practices by scientific methods, teach medical doctors with evidence-based information during the undergraduate period and empower them through practical training in the post-graduate period.

### Continuing Education Practice and Research Centre (SEM)

At Istanbul Medipol University Continuing Education Centre, educational programs are developed by our university's academic staff members and educationists. The objective of this centre is to offer educational programs other than those included in our University's undergraduate and graduate programs to the benefit of public and private sectors and provide advising and educational services wherever needed by these sectors.

Visit the Continuing Medical Education Courses <https://cme.medipol.edu.tr/>

\*For detailed information, please visit <https://www.medipol.edu.tr/en/research/research-centers>

# Graduate Schools

The graduate education enables any students with a bachelor's degree to both specialize and contribute to the science world by doing a master's or doctoral degree in a discipline of interest based on their undergraduate education. The Graduate Schools of Forensic Sciences, Natural and Applied Sciences, Health Sciences and Social Sciences within Istanbul Medipol University aim to educate scientists who meet today's requirements in their own field at scientific and technological levels and have the capability to make original contributions to the studies carried out all over the world with the formation and knowledge acquired. The mission of Istanbul Medipol University Graduate Schools providing education in master's and doctoral degrees is to educate successful academicians of the future.

### 1-Graduate School of Health Sciences

The Graduate School of Health Sciences of our University aims to educate scientists who meet today's requirements in health sciences at scientific and technological levels and have the capability to make original contributions to the studies carried out all over the world with the formation and knowledge acquired. Our Graduate School offers education in 55 individual programs.

<https://medipol.edu.tr/akademik/enstituler/saglik-bilimleri-enstitusu>

### 2-Graduate School of Social Sciences

Pursuing the goal of contributing to the science world on national and international scales through its graduate programs, our Graduate School of Social Sciences aims to provide students with the necessary knowledge of their fields of study and the ability to conduct research independently and produce an original and high-level work with the help of its experienced and skilled academic staff. In line with these goals, our Graduate School offers MD and PhD programs.

<https://medipol.edu.tr/akademik/enstituler/sosyal-bilimler-enstitusu>

### 3-Graduate School of Engineering and Natural Sciences

Graduate School of Engineering and National Science have been established to contribute to the scientific world at the national and international level through its graduate programs that aim to provide its students with the necessary

knowledge in their fields of study, to conduct independent research and to create a unique and high-level work. GSENS also plans to act as a bridge between universities and industrial by conducting applied research. Education and research activities were carried out with the most expert researchers and lecturers who have experience abroad.

GSENS recommends all applicants to visit <https://sens.medipol.edu.tr/> website to see profile of faculty members to look for a match with applicant's research interest. Please, contact with the faculty member to have an informal interview that

applicant can get more information about specific conditions for research of interest. Applications to the available programs can be done through online application system. International applicants for PhD programs have to prove their language skill with TOEFL-IBT certificate. Only MS applicant can take the university proficiency exam if they don't have a valid TOEFL-IBT results. If international applicants apply for a Turkish program, they have to submit a TOMER certificate. (Turkish proficiency certification).

# Language Education in Medipol

## Learn Turkish

Istanbul Medipol University Turkish Language Teaching Application and Research Center (TOMER) is the language teaching centre which is responsible for teaching Turkish as our native language to foreign students. With the increasing interest in Turkish language and Turkish culture, teaching Turkish to foreign nationals has become a very important and constantly developing science.

The centre aims to teach Turkish to foreign students who come from abroad to study in higher education institutions, to ensure training of lecturers who go abroad from Turkey to teach Turkish, to organize courses in foreign languages that are required, to make the necessary documentation and material work, to carry out collaborative projects with national and international institutions and to enable to share the knowledge formed in national and international fields with various activities and to pave the way for scientific research based on original research and examination that focus on the problems faced with teaching Turkish.

## Learn English

Our Language School English program aims to provide our students with the necessary language skills and to let them use English fluently in their career areas in a globalized world.

## English Preparatory Program

The four-level English Preparatory Program is intended to provide the ability to use a foreign language effectively to students who take department courses in English. The completion of all levels under the program is divided into 4 separate periods consisting of a total of 33 weeks. At the end of 33 weeks, students starting at levels A1, A2 and B1 complete the level B2 at which they can use English fluently with individual programs designed for each start level.

## Exemption for International Students

For exemption from the preparatory program, international students are required to have at least three years of citizenship in a country where English is spoken as mother tongue and to have completed secondary education at institutions of that country.

## Accreditation

Our Language School is awarded the title of Internationally Accredited Language School (Pearson Assured) in all its educational processes. Accreditation means that our Language School is certified as a top-level educational institution in terms of corporate self-reliance, students' gains, and national and international recognition.

Pearson Assured Accreditation is an international and independent system for third party organizations that have training / learning programs designed to be delivered and evaluated internally within the organization. The students of these accredited educational institutions are entitled to receive the internationally recognized "Pearson Assured Certificate."

Pearson, one of the world's leading organizations, cooperates with more than 1000 institutions in over 100 countries. Being accredited by Pearson shows that the Istanbul Medipol University Preparatory Program complies with international quality standards and provides an important assurance for the quality of education for our students.

Pearson Assured Certificate

Receiving this certificate, which will be prepared [and sent to Istanbul Medipol University Preparatory Program by Pearson Assured, provides a significant advantage to our students in their academic life and job applications.](#)

## Educational Opportunities

### Internal Transfer

Internal transfer is to change a diploma program to another same level program within the university.

### Double Major/Minor Programs

We offer our students an opportunity to obtain a second diploma and certificate with the Double Major and Minor Programs. There is no additional tuition fee for Double Major and Minor certificate programs completed on time from the students whose applications are accepted by fulfilling the required conditions

Successful students who meet the necessary conditions can take courses from another diploma program simultaneously and graduate from two undergraduate diploma programs with the Double Major Program.

A student enrolled in a diploma program meeting the requirements can obtain a Minor Certificate -that does not replace a diploma- by taking a limited number of courses for a specific subject within the scope of another diploma program in the university.

### Undergraduate Special Students (Visiting Students)

Being a special student means a student enrolled in a higher education institution and wants to continue his/her education in a different higher education institution because of his/her special condition, health, and similar reasons. In this case, students continue to be registered in their universities. Students are

admitted to classes with the decision of the relevant board of directors. Students are given transcripts indicating the courses they have attended and credits and grade(s) received.

Those who take courses as special students may request an exemption for the courses they have passed, if they register at Istanbul Medipol University in the following years. Special students pay the tuition fee per credit of the program in which they study.

### Graduate Special Student (Visiting Student)

Those who are graduates or students of a higher education institution and want to deepen their interests on a certain subject can enrol in as a special student the courses opened in the institutes with the approval of the relevant department directorship without meeting the term requirements.

Being a special student is not an education type aimed directly at obtaining a degree in the relevant program, and its duration cannot exceed two semesters.

Special students are not awarded a diploma or degree. However, a document showing the courses taken and grades given in the programs they attend is given to students.

In order to register for the courses, special students must obtain approval from the departments of the relevant courses and fulfill their financial obligations.

Those who take courses as a special student cannot benefit from student rights, but they

have to fulfill the student obligations just like the other students.

According to the criteria determined by the Council of Higher Education and the Senate, students who take courses as a special student and also who are entitled to study at our university may be granted an exemption from the relevant courses in the graduate programs. Courses to be exempted and the grades to be included in the grade point average will be determined by the Board of Directors of the Institute by taking the opinion of the head of the department.

#### Integrated Graduate Education

Our students are allowed to do master and doctorate degrees before graduating. Students who complete the first two years (4 semesters) of their undergraduate program in schools that offer four years of education and students who complete at least two years (4 semesters) or graduated from the School of Medicine, School of Dentistry and School of Pharmacy that offer for five or six years of education can combine it with the doctorate program without interruption.

#### Become a Scientist & Double Majority

Istanbul Medipol University has an academic staff that has accomplished important works worldwide. This strong structure, supported by advanced research centres and laboratories, offers students a great opportunity to become scientists. Students who want to progress towards becoming scientists are encouraged in this regard from their first year. They are

included in research projects with all kinds of opportunities, where they can benefit from the experience of expert instructors. Students learn the basic research principles of being a scientist both theoretically and practically as a research assistant in the first year of their education. In their second year, they start working on a real research project as research students under the supervision of an academic. Students start focusing on their projects from the third year. They can start their master or PhD theses if they wish while continuing their undergraduate classes and can progress faster in their careers.

You can get a second diploma and a certificate with double major and minor programs, along with the diploma of the program you study. For detailed information, you can reach us on +90 444 85 44.

# Erasmus

## What is the ERASMUS Exchange Program?

Erasmus+ is the EU Programme in the fields of education, training, youth and sport for the period 2014-2020. The Erasmus+ Programme is designed to support Programme Countries' efforts to efficiently use the potential of Europe's human and social capital, while confirming the principle of lifelong learning by linking support to formal, non-formal and informal learning throughout the education, training and youth fields.

IMU has been acquired Erasmus+ University Charter and currently establishing bilateral agreements with multiple European Higher Education Institutions.

<https://www.medipol.edu.tr/en/prospective-students/erasmus>

# Mevlana

## What is the Mevlana Exchange Program?

Mevlana Exchange Program provides to exchange students and academic staff between the Turkish higher education institutions and higher education institutions on abroad. With the Regulation published in the Official Gazette dated 23 August 2011 No. 28034, the exchange of students and academic staff has been possible between the Turkish higher education institutions and higher education institutions on abroad.

For students, they can study abroad at least one term up to two terms. For academic staff, they can lecture abroad at least one week up to three months. At the same time, students and academic staff from any country may study or lecture in line with the program at Turkish higher education institutions.

For more detailed information about the program check the website:

<https://mevlana.yok.gov.tr/>

LIFE ON  
CAMPUS

# Dormitories

## Dormitories

Our boy's and girl's dormitories with a capacity of more than 2,500 beds located on our Kavacık North - Kavacık South Campuses are equipped with smart building systems as in all educational buildings. The Boy's Dormitory is located on Kavacık North Campus and the Girl's Dormitory is located on Kavacık South Campus.

### Girl's Dormitory

- ▶ Rooms are available with 3- and 4-bed options. 3-bed rooms use bedstead systems, while 4-bed rooms use bunk bed systems.
- ▶ Rooms are equipped with study desks for each student as well as bookcases and cabinets and password-locked wardrobes.
- ▶ Rooms are also furnished with shower systems, water closets, mini fridges and shoe cabinets.
- ▶ Wi-Fi service is rendered free of charge.
- ▶ The dormitory has its own cafeteria along with a mini hobby kitchen and canteen.
- ▶ A fitness center is available for the use by our students.

### Facilities Offered by the Boy's Dormitory

- ▶ Rooms are available with 1- and 3-bed options.
- ▶ Rooms are equipped with study desks for each student as well as bookcases, wardrobes and beds.

- ▶ Rooms are also furnished with phone installation, shower systems, water closets, mini fridges and shoe cabinets.
- ▶ Wi-Fi service is rendered free of charge.

### Housekeeping Services

- ▶ Beds, duvets, pillows and bed linens are provided by the dormitory and cleaned periodically.
- ▶ Rooms and common areas are cleaned every day by a contracted cleaning company.
- ▶ Buildings have a laundromat to allow students to wash their laundry, where ironing services are provided.
- ▶ Students are offered three meals a day in our dormitories. Students pay meal costs in our dormitories.

# Student Clubs & Sports Activities In Medipol

Our university is represented by 12 male and 9 female sports teams in football, indoor football, basketball, volleyball, tennis, table tennis, kickboxing, chess, track and field, handball and archery branches. We have medals and championships in football, basketball, tennis, archery, wushu and many other sports.

The Sports Coordinatorship supports sports and athletes with fields and many training opportunities. Every year, the Department of Cultural Affairs and the Sports Office organize a variety of cultural, sports, and arts events such as student groups and societies, concerts, exhibitions, shows, and conferences. In order to become a member of these groups and participate in the activities, one should apply to the Office of Cultural Affairs and Directorate of Health, Culture, and Sports, and fill out a membership form.

Department of Cultural Affairs and the Sports Office: Health, Culture and Sports Department

Address: Kavacık South Campus Kavacık Mah. Ekinciler Cad. No: 19, Kavacık Kavşağı, 34810 Beykoz, Istanbul -Office B2 Floor

Email: [sks@medipol.edu.tr](mailto:sks@medipol.edu.tr)

Phone: 444 85 44 (2050)

## Sports Courts

Istanbul Medipol University has sports courts used for football, basketball, volleyball, and tennis. Teams Our university has Men's Basketball and Football teams. These teams organise qualifying player events at the beginning of the school year and continue their training throughout the year under the guidance of their coaches. Both our teams compete in the tournaments held by the Turkish University Sports Federation, Koç Fest, and Unilig to represent our university. Our solo athletes also compete in various tournaments across Turkey to represent the university.

## Career Office

This unit works on the career planning of Istanbul Medipol University students and graduates, directs them about the internship and job finding process, and creates relevant employment opportunities for them.

## Goals

- ▶ Increasing the number of institutions students can do an internship.
- ▶ Working on both national and international employment opportunities for Istanbul Medipol University graduates.
- ▶ To carry out activities and studies in order to increase the professional and personal skills of each student/graduate according to the market qualifications and requirements.
- ▶ To cooperate with industry, university, and other institutions and organizations, to develop joint projects.

## Catering Services

The catering services on Kavacık, Haliç and Bağcılar Campuses of Istanbul Medipol University are provided by a private catering company. Catering services are offered in three meals (breakfast, lunch and dinner) on Kavacık Campus where boy's and girl's dormitories are located. Catering services are provided on a self-service and à la carte basis.

## Stores

Some brands are available on Kavacık South Campus of our University, such as Etiler Marmaris, Starbucks, Kahve Dünyası, Simit Sarayı, Subway and Casariso. For personal care needs, Gratis also serves our students on South Campus.

A great number of cafés, canteens and buffets render services on Kavacık North, Haliç and Bağcılar Campuses. Featuring with their elegant and modern architecture and delicious offerings, Pol'in cafes located on Kavacık and Bağcılar campuses are the places where students spend a pleasant time.

## Hairdressing Salons

Men's and women's hair salons are available on Kavacık South Campus to serve all our students so that they can make time for themselves in a busy schedule of study.

## Transportation

Shuttles travel between our campuses regularly during the day. In addition, our campuses are accessible by shuttle services provided on certain routes.

## Security

The Private Security Unit supervised by the Security Coordinator's Office of Istanbul Medipol University protects the safety of life and property of the university staff members and students against possible threats, ensures the continuation of education in a sound, peaceful and uninterrupted manner, and takes the necessary measures in this regard. The areas on all campuses of our university designated in the security protection plan are under

surveillance 24/7 by the patrol system. Several physical locations of our campuses are equipped with card and authorization systems. The access control is provided by turnstiles and face recognition systems available at the entrance and exit points in all campuses and dormitories. Our campuses and dormitories are under surveillance by closed circuit security cameras (CCTV). Vehicle access is allowed by HGS (Fast Transit System) system on security checkpoints where any vehicle drivers who want to enter the premises are recorded.

## Disability Service

The office was established to provide equal opportunities in education to students with disabilities.

Within this framework, we determine the needs and difficulties of disabled students in various fields (academic, administrative, physical, psychological, and social) during their education, and conducts activities, initiatives and, collaborations to the University's facilities and services.

In order to become an accessible university, we aim to realize physical, digital, and mental transformation and to make culture accessible.

For detailed information about the services and applications of the unit, you can contact our office located on the south campus with the health board report and application form.

## Fully Equipped Study Station

The device, brought to our university by the Language School, converts any Turkish and English printed materials into audio for the visually impaired students. The device, which is consist of a computer and scanner, is located at the Kavacık North Campus. Students need to contact the staff of the Disabled Student Unit (contact information down below) to use the device.

Library services at Istanbul Medipol University are offered on Kavacık North, Kavacık South, Haliç and Bağcılar Campuses (Medipol Mega University Hospital). Our 4 libraries that serve on a total area of 4,866 m<sup>2</sup> as equipped with shelves having a capacity of 87 thousand volumes of books are home to 43 thousand academic books growing in number each day.

Our library constantly keeps itself updated with its infrastructure that supports education, training and research programs, meets the information and documentation needs of instructors, students and other researchers and closely follows developments in the world.

Our library allows access to national and international publications in many fields from health, social and natural sciences to culture, art and literature thanks to its advanced information technology.

Featuring 43,071 printed publications, 514,344 full-text e-books, 59 printed periodicals, 44,048 full-text e-journals, 462 multimedia, 431 theses, and 290,566,676 digital publications including news reports, journals, books, biographies and reports, our library is subscribed to 40 databases.

Thanks to the facilities offered by technology, our library focuses on the improvement of collections and provides students with quality electronic information resources. Using mobile technologies extensively for access to information resources, it helps meet the needs of students in research and education regardless of time and place.

Our libraries are available for service as follows:

\*Kavacık North Campus Library 24/7,

Kavacık South Campus, Haliç Campus and Mega Hospital Campus, Weekdays: 08.30 a.m. - 10.30 p.m. / Weekends: 08.30 a.m. - 10.30 p.m.

### Rare Collection

Our library has a rare collection consisting of 56 books dating before 1950s. The works are protected by a special protection status and solely exhibited in glass cabinet displays. The entire collection is digitalized and made available online for those who intend to examine it in detail. Our collection development policy attaches importance to remote access, either in or off the campus, to electronic publications and databases as well as to printed sources.
